Problems installing com_multisitescontent_V1.0.12

Posted by IPCB - 2011/03/11 11:20

Hello,

Hello, I am trying to install in Joomla 1.6 com_multisitescontent_V1.0.12 but always get this error:

JInstaller: :Install: File does not exist /www0/www5.ipcb.pt/tmp/install_4d79f6c6def44/admin/install.xml

I wonder if you can help me...

Thanks in advance

Paulo

As you can read in the product detail, the "Article Sharing for JMS" is only compatible with Joomla 1.5.
http://www.jms2win.com/en/download/article-sharing
So this is normal it does not work with Joomla 1.6.

We are working on a new "Article Sharing" that will be compatible with Joomla 1.6.
I can not yet tell you if this will be a new version or a new product. All will depends on all the differences between Joomla 1.5 and 1.6.
As Joomla has totally refactor their article processing, perhaps we will have to build a separated product for joomla 1.6 only.
