Error message when trying to create from front end

Posted by locofede - 2011/08/02 10:17

The error message below appears when trying to using the "Create a slave sites" and "List all slave sites" as a menu item.

"Fatal error: Class 'JModel' not found in /home/demosite/public_html/modules/mod_jabulletin/helper.php on line 16"

Any help will be much appreciated
