Problem with "Share from Master"

Posted by simonegiusti - 2011/10/07 13:48

I get always an error when I try to share a compatible extension from master (jevents, remository etc...)
No problem with the same extensions using "install from master".

Warning: Missing argument 5 for MultisitesDatabase::createViews(), called in C:Inetpubvhostssimonegiusti.ithttpdocsjoomlaadministratorcomponentscom_multisitesmodelstools.php on line 1565 and defined in C:Inetpubvhostssimonegiusti.it httpdocsjoomlaadministratorcomponentscom_multisitesclassesmultisitesdb.php on line 1017

_____

I tried to grant all privileges to mysql user and now I received 'only' this error:

Warning: Missing argument 5 for MultisitesDatabase::createViews(), called in C:Inetpubvhostssimonegiusti.ithttpdocsjoomlaadministratorcomponentscom_multisitesmodelstools.php on line 1565 and defined in C:Inetpubvhostssimonegiusti.ithttpdocsjoomlaadministratorcomponentscom_multisitesclassesmultisitesdb.php on line 1017

Any hints ????

_____

Concerning the "command denied to user" that you reported, that was effectivelly a problem of MySQL user privileges that had to be increased.

Concerning the second message, this is a warning message that we will try removing in a next release. Thank you for having reported this warning message.
