

## Problem with "Share from Master"

Posted by simonegiusti - 2011/10/07 13:48

---

I get always an error when I try to share a compatible extension from master (jevents, remsitory etc...)  
No problem with the same extensions using "install from master".

Re:Problem with "Share from Master"

Posted by simonegiusti - 2011/10/07 14:18

I tried to grant all privileges to mysql user and now I received 'only' this error:

Warning: Missing argument 5 for MultisitesDatabase::createView(), called in  
 C:\inetpub\hostssimonegiusti.it\httpdocs\joomlaadministrator\components\com\_multisites\model\stools.php  
 on line 1565 and defined in  
 C:\inetpub\hostssimonegiusti.it\httpdocs\joomlaadministrator\components\com\_multisites\classes\multisitesdb.php on line 1017

Any hints ?????

---

Concerning the "command denied to user" that you reported, that was effectively a problem of MySQL user privileges that had to be increased.

Concerning the second message, this is a warning message that we will try removing in a next release. Thank you for having reported this warning message.
