[function.require-once]: failed to open stream

Posted by jwnweb - 2011/10/20 17:48

I have one template and one site that has been successfully created from the template. After creating a second site from the template I received the following error:

Warning: require_once(/home/#####/public_html/cws/components/com_sh404sef/shSec.php) : failed to open stream: No such file or directory in /home/#####/public_html/admin/plugins/system/sh404sef/sh404sef.php on line 41

I have tried to uninstall and reinstall the sh404sef plugins using the Website Tools functions but to no success.

Any Ideas?

Thanks

Which version of sh404SEF do you use ?
We know that recent version of sh404SEF have introduced bugs inside sh404SEF.

So I suggest that you report the bug to SH404SEF

Sorry for taking so long to get back to you. :(
The version of com_sh404sef we are using is 3.3.0.1122

Thanks

We don't know this version 3.3
Would you please send us a copy in the attachement of an email for review.
See the "contact us" for the email address.
