Fatal error: Allowed memory size when in tools

Posted by kremedia - 2011/11/29 02:03

Hi

I just upgraded to the latest jms version and reinstalled the patches.

I then went into tools to install the plugins on a couple of websites. I now receive the following error:

Fatal error: Allowed memory size of 33554432 bytes exhausted (tried to allocate 105 bytes) in /home/krem/public_html/cms/libraries/joomla/language/language.php on line 353

Disregard. Got it working

I've installed a joomla plugin that was overriding the php.ini setting.

All sorted!!
