Migration problem

Posted by AnyWay - 2012/02/06 20:39

Hello,
I've just upgraded from J1.5 to J2.5, anyway now, the master site is working, but slave site isn't:
http://chat.chat-senza-registrazione.com/ (slave) http://www.chat-senza-registrazione.com/ (master)

Which can be the problem? I see only a blank page.

Thank you.

As your title mention it, this is a migration and you have to migrate all the slave site DB in Joomla 2.5.
As the DB layout is modified, this must be migrated manually in each slave site.

See the joomla manual migration explain in the joomla website.
http://docs.joomla.org/Tutorial:Migrating_from_Joomla_1.5_to_Joomla_1.6

When you have a blank page, this is the symptom of a PHP Fatal error.
So check your "error log" file to get more info on the reason of the error.
