## Install jms multisite ver. 1.2.78 on joomla 2.5.2 Posted by ammgarr - 2012/03/09 13:38

I buyed today jms multisite ver. 1.2.78. I can't install on joomla 2.5.2:

There was an error uploading this file to the server. Unable to find install package.

I could install the component with much trouble: we uploaded the unzip folder of jms component on temporary directory and we use for install the "Install from Directory" option.

## Re: Install jms multisite ver. 1.2.78 on joomla 2.5.2 Posted by edwin2win - 2012/03/10 14:58

Perhaps that you server does not allow to upload huge files (4.6 MB). Verify you PHP upload max size parameter.

If this is the case, see the alternate solution to install from a directory as explained in the tutorial video 3. http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-from-directory http://www.jms2win.com/en/tutorial#jms12x-3
