Live Examples?

Posted by spindoc - 2013/08/07 20:05

Can I see some live sites that use multisites?

Can someone post their sites here so we have examples of some working sites that use this component?

You are already on a live sample.
www.jms2win.com is a slave site of our company.

See also www.mywebsite2win.com that is a portal that we created that contain several other slave sites with different looks.
