Customs component features

Posted by Ramu - 2014/08/08 06:31

Hi,

i want use customs component with jms multisite and now currently i am using some custom compoenet,module and plugin in my old website and now i would like to ask you that customs component will work with the jms multisite and can i created some extra custom component in the masters and slave website.

If i used this features than jms multisite will except this features or not and jms multisite have this feature anyone can help me to solve this problem.
