Community Builder 1.2 stable incompatible?

Posted by LUH3417 - 2009/02/07 17:41

I did update Community Builder from 1.2 RC4 to 1.2 stable via expert modus.
Unfortunately i get now the following error message:

Fatal error: Call to a member function _outputToHeadCollectionStart() on a non-object in .../html/joomlaMS/administrator/components/com_comprofiler/admin.comprofiler.controller.php on line 103

Maybe i have just to follow the ordinary to update and not the expert way?
But bevore the expert way was working fine.

The admin.comprofiler.controller.php file is added here!?
