# :master_db: appearing in search results

Posted by iage - 2014/11/28 15:42

---

Hello,

In search-results on our slave-sites, the text ':master_db:' appears. Can this be hidden somehow?

Kind regards -Stephan

I don't know where it appears and the content but you have the Search/Replace plugin that may sometimes helpfull to perform specific task.
https://www.jms2win.com/en/component/docman/doc_details/13-search--replace-utility

So depending on where it appeards, you can setup the Search/Replace to replace anything in a webpage.
