# Fatal error: Uncaught exception 'RuntimeException'

Posted by azurelink - 2015/05/06 00:22

---

When attempting to install an extension in a slave site, I am getting the following error in a white screen:

---

Fatal error: Uncaught exception 'RuntimeException' with message 'Library path /libraries/framework cannot be found.' in /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/libraries/loader.php:374 Stack trace: #0 /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/administrator/components/com_multisites/libraries/joomla/jms2winfactory.php(35): JLoader::registerNamespace('Joomla', '/home/myaccount/d...') #1 /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/administrator/components/com_multisites/libraries/joomla/installer/installer_multisites.php(27): require_once('/home/myaccount/d...') #2 /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/includes/defines_multisites.php(627): require_once('/home/myaccount/d...') #3 /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/includes/defines_multisites.php(662): MultiSites::onInstallSetOverwrite() #4 /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/includes/defines_multisites.php(685): MultiSites::main() #5 /home/myaccount in /home/myaccount/domains/mytld.com/subdomains/mysubdomain/public_html/libraries/loader.php on line 374

---

What is happening and how can I fix this?

Thanks
