Register JMS component 1.3.57

Posted by alexandro - 2016/02/29 03:15

Hi.

I need to register my component to release the system to create the sites and front. When I access the button to register, the following message appears:

Message
An error has occurred during registration.

Invalid product key received! Please contact your distributor or re-saler.

How do I resolve this issue?

Thank you

Dear,
I need an answer on the issue of registration.
Thank you

Can you send us by email the product number that you see in the about menu.
We will have a look to register for you.
See our contact page to find the email address.
