new extension jDBexport

Posted by schultz - 2016/04/26 12:45

Bonjour Edwin,

what do you need to include another component into the definitions?

I am developer for a "data reporting" extension called jDBexport (see jDBexport at JOOMLA Extension directoryhttp://extensions.joomla.org/extensions/extension/core-enhancements/data-reports/jdbexport)

Kind regards
Ruediger

Just send us the extension in the attachement of an email and we will review it to add its definition into JMS.
If you also want a review to see if the extension could have its content shared between the website, also mention that in your email and also for which joomla version you would like this review.

See our contact page for the email.
