Replicate Master???

Posted by greglouckS@mail.com - 2018/02/07 04:49

What option do I choose for making a site identical in every way to the master domain?

Thanks,
Greg

You can use the JMS Template rules
replicMasterXXXX
where XXXX is Domain, Subdomain, Subdir, Multisites

replicMasterDomain when the new site is a domain
replicMasterSubdomain when this is a subdomain
replicMasterSubdir when this is a subdirectory of the master
replicMasterMultisites when this is a subdirectory of /multisites
