Patches not OK after update to 1.3.04

Posted by StewartK - 2013/02/22 12:42

Hi

I have just updated Multisites from 1.3.03 to 1.3.04 and although the install completed successfully, the includes/defines_multisites.php is showing in the patches list as not OK. For that file the patches are showing that an update is available and should be installed.
I have tried removing the patches and reinstalling them again but the issue still remains.

I am running Joomla 2.5.9 in case the version has a bearing on it.

Thanks

Stewart

---

i have the same problem. I'm testing it in Joomla 1.5.26 and in Joomla 2.5.9... same result.

My hosting server is based on PHP 5.2.17 and mysql 5.1.66-0+squeeze1.

Any ideas??

Thanks.

Max.

It seems that a problem of packaging as the reason of this issue.
I have re-package the installation in JMS 1.3.06

See get latest version to get a new download ID.
