Joomla 3.4.0 Check patches installation breaks

Posted by lotustechsol - 2015/02/25 03:14

_____

libraries/cms/installer/installer.php
Not OK
Install the Joomla 1.5 legacy API for the getinstance() to return a reference.
Actions:
Replace "function getInstance()" by "function &getInstance()"
This allow get the reference of the instance created instead of a copy.

Re: Joomla 3.4.0 Check patches installation breaks

Posted by edwin2win - 2015/03/02 13:43

Fix released in JMS 1.3.42 the day after that Joomla released their 3.4.0 version.
See change history at
https://www.jms2win.com/en/faq/change-history-13x

As usual, it is recommended to perform the update of all the extension (not only JMS) with the latest version before doing any Joomla upgrade
