Fatal error when saving configuration on slave

Posted by muskes - 2009/01/12 22:29

_____

Dear Edwin,

I always receive an fatal error when I try to update the konfiguration of my slave site:

Fatal error: Class 'JConfig' not found in
/var/www/myaccount/directoryofmymastersite/includes/framework.php on line 48

Please can you help me?

Best Regards
Muskes
